Cloud in numbers

Things + devices
\$1.9T

Gartner estimates the total economic value-add from the Internet of Things across industries will reach US\$1.9 trillion worldwide in 2020¹

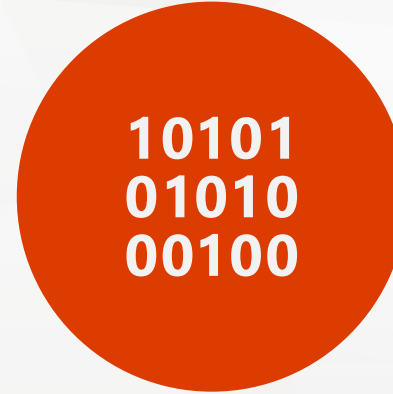

Gartner "Forecast: The Internet of Things, Worldwide, 2013," (G00259115), Peter Middleton, Peter Kjeldsen, and Jim Tully, November 18, 2013

Applications
\$77B

By 2017, mobile apps will be downloaded more than 268 billion times, generating revenue of more than US\$77 billion²

Gartner Report, "Predicts 2014: Apps, Personal Cloud and Data Analytics Will Drive New Consumer Interactions" Stephanie Baghdassarian, Brian Blau, Jessica Ekholm. Sandy Shen, November 22, 2013.

Data
\$1.6T

Dividend available to businesses that put new data types and analytics in the hands of more employees over the next four years³

IDC "Capturing the \$1.6 Trillion Data Dividend," Dan Vasset, Henry D. Morris, John F. Gantz, May 2014

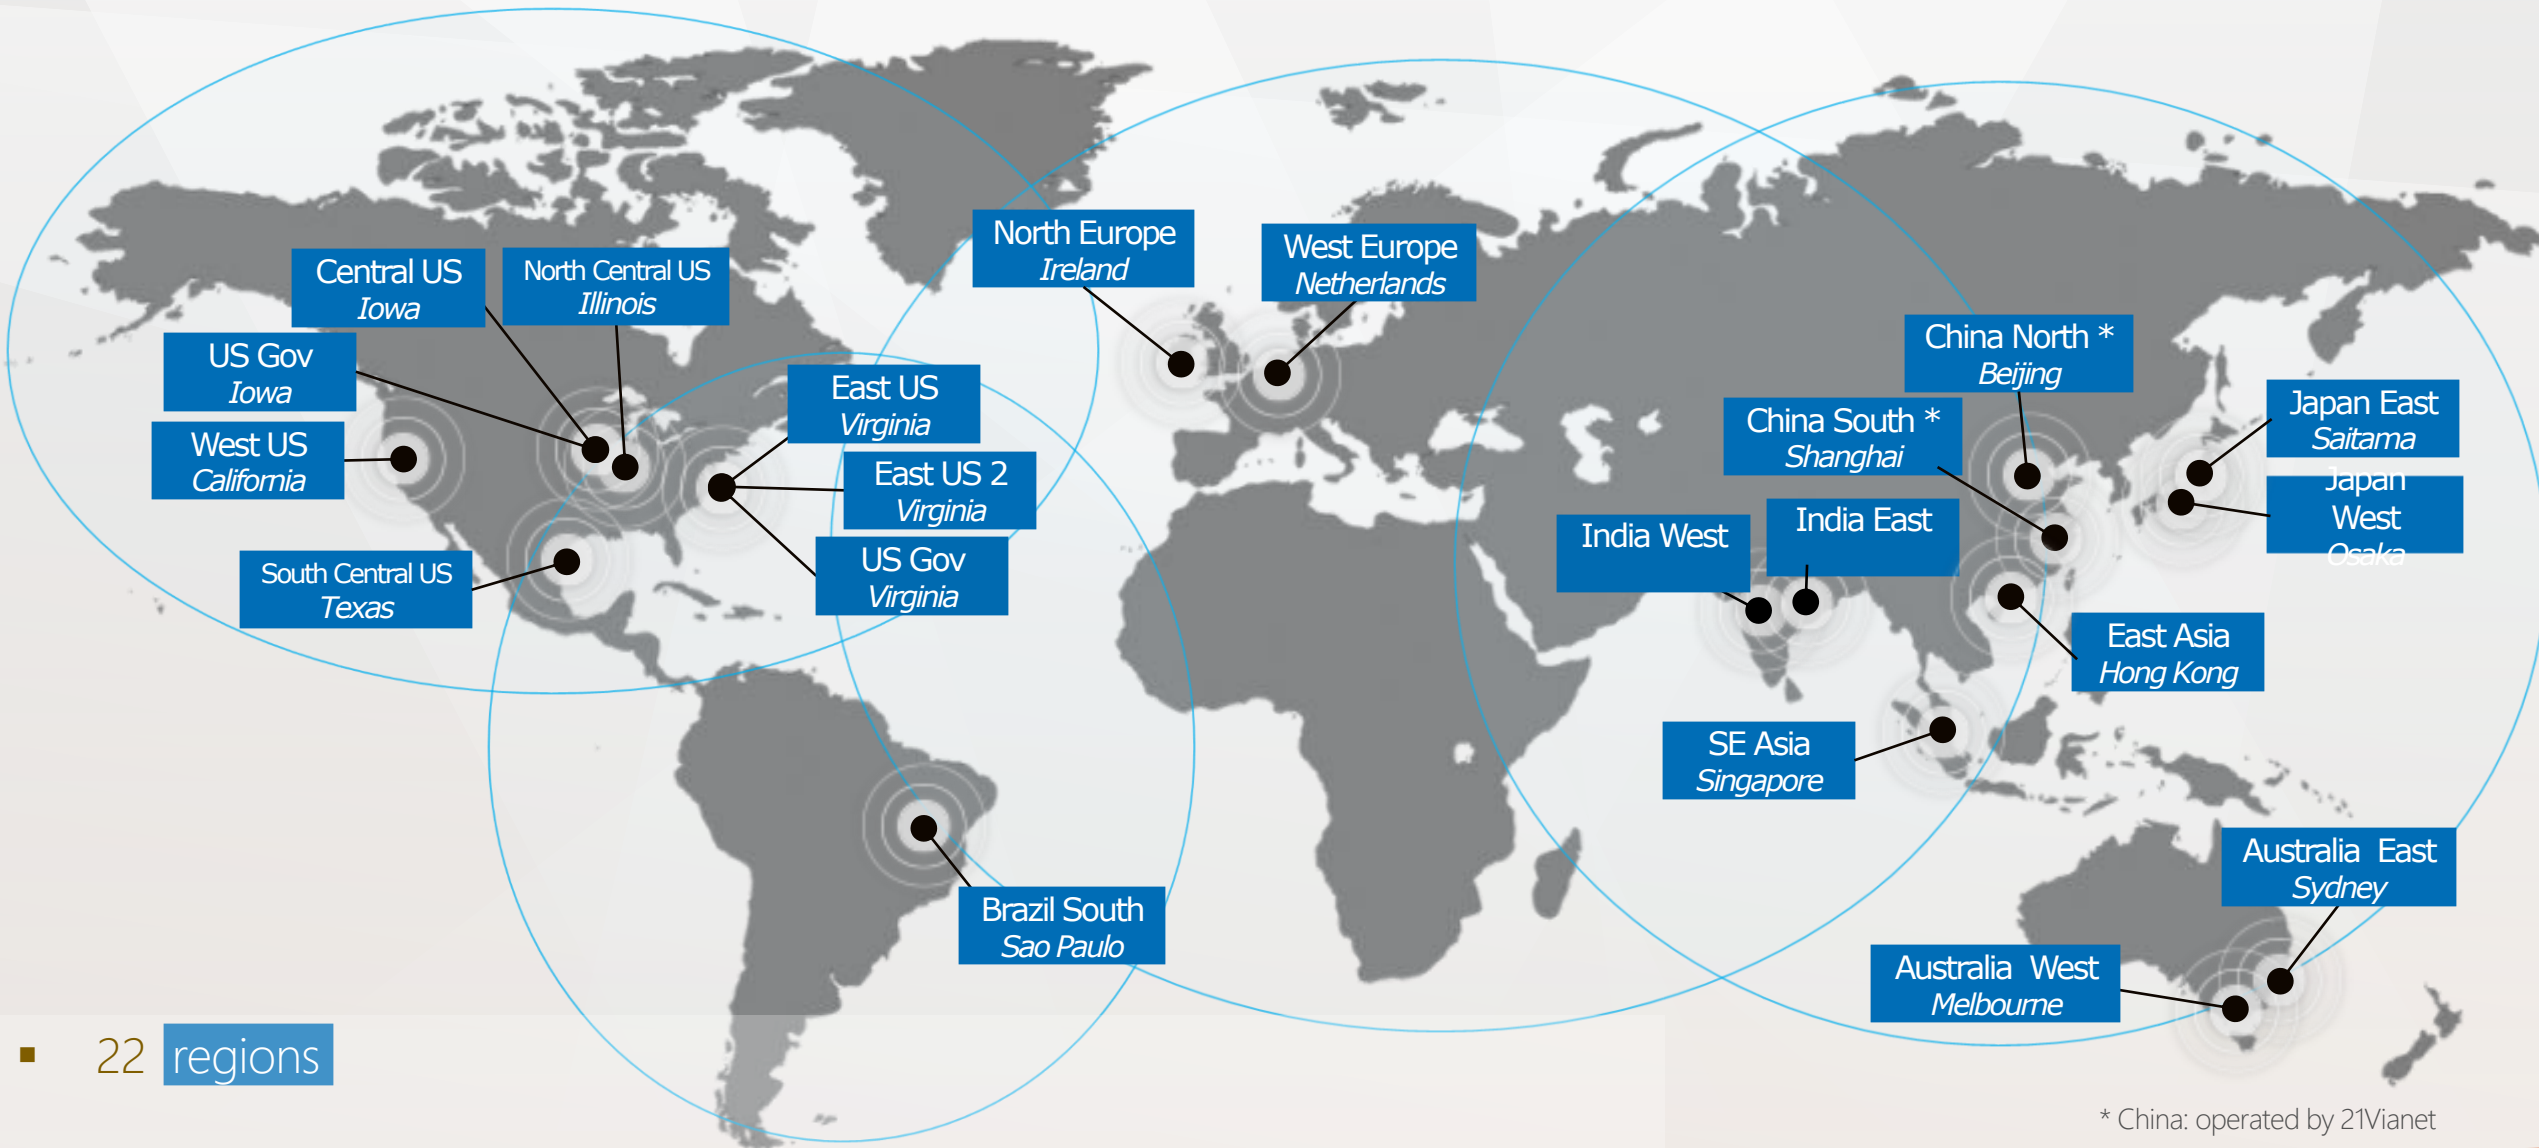

Infrastructure
~ 50%

Agility accounts for 50 percent of the reasons for going to the cloud, versus 14 percent for cost savings⁴

Gartner "Hype cycle for cloud computing, 2014", David Mitchell Smith, July 24, 2014

What is Microsoft Azure?

* China: operated by 21Vianet

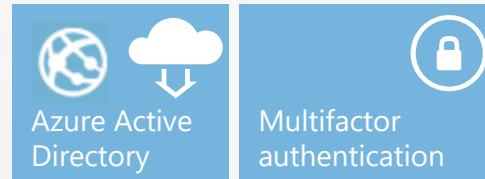

- 22 regions
- 100+ datacenter including COSN partners

Why Microsoft Azure?

Trusted, open, and flexible

Deep commitments to security, privacy, and interoperability

- ▶ Security at the core
- ▶ Privacy by design
- ▶ Compliance and reliability commitments

Consistent experiences across devices

- Windows, iOS and Android support
- Single sign-on to more than 1,400 SaaS apps

Extensible app development

- Support for Open Source and .NET
- Interoperate with existing applications using Open Standards

All data, any size, anywhere

- Process big data on platform you choose
- Store, access, combine, and analyze data on premises to cloud, relational and non-relational

Flexible infrastructure

- Run Windows and Linux
- Manage and monitor your heterogeneous IT environment

1B+

customers use Microsoft Cloud in 20 million businesses from more than 90 countries
